## Do-Follow Backlink Packet

Hi!

Welcome to the first (of many) do-follow backlink packs. Every week or two I'll be supplying you with fresh, high quality do-follow backlinks, along with tips on applying them successfully to your Harvester sites, if required.

### This month...

This month I've collected 5 high quality do-follow sites (including .gov & .edu!) which will pass plenty of delicious link juice on to your Harvesters. Applying just a couple of these links to your site will ensure you are feeding your site all it needs to climb rankings. Combing these with the Pixel2Life PPC Loophole can bring a lot of power in a very short period of time! It's worth noting that these links can take up to a week (sometimes longer) to take effect on your sites rankings.

### The links:

#### 1. Weblcy

<http://www.weblcy.com>

The screenshot displays the 'Edit Signature' interface on the Weblcy forum. At the top, there's a navigation menu with links for 'User CP', 'Invite Your Friends', 'Arcade', 'FAQ', 'Community', 'Calendar', 'New Posts', and 'Search'. Below this is a 'Your Control Panel' sidebar with various user management options. The main area is titled 'Edit Signature' and includes a 'Preview' section showing the current signature text: 'The Clickbank Code'. Below the preview is a rich text editor with a toolbar containing icons for font selection, size, bold, italic, underline, text color, background color, bulleted list, numbered list, link, unlink, image, video, and smiley. The text in the editor is '[URL="http://theclickbankcodex.com"]The Clickbank Code[/URL]'. A 'Smilies' panel is visible on the right side of the editor.

Weblcy is a forum which provides a nice do-follow backlink via your signature. After signing up and logging in, you'll be taken to your 'dashboard' where you can add one; head over to the "edit signature" section and type in your desired anchor text (your main keyword or a variation), highlight it, and then select the little icon of the

## Do-Follow Backlinks

### 2. GeekPoint

<http://www.geekpoint.net>

GeekPoint uses the same forum software as Webcly, so the instructions for applying your backlink are identical. However, this forum has some quality control; you'll need to make 10 posts in the forum before you can add a signature. This will only take you 10-15 minutes, and for a high quality backlink, it's nothing! Plus, this quality control means the link is worth more than most forums. Go for it!

### 3. Biblio

<http://forum.biblio.com>

**Username:**

**Subject:**

**Confirmation code:**  
Enter the word on the left exactly as it appears. All letters are case insensitive, there is no zero.

**Rich Text Editor:** **B** *i* u **Quote** **Code** **List** **List=** **[\*]** **Img** **URL** **Normal** **Font colour**

Hey guys, great to meet some fellow UK people! :) See you in the forums. x

**Smilies:** 

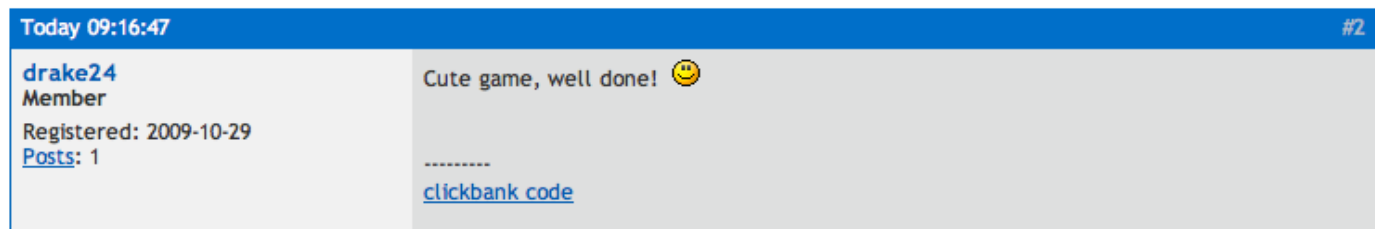

Biblio has a great forum in which you can drop Do-Follow links - it's fairly unknown, though it does get the occasional spammer dropping way too many links. A great thing about Biblio is that you don't need to register; head to the introductions section, go in to a thread and click Post Reply. You'll be taken to the screen shown above. Leave your Username blank, type in the Captcha code and write a small post as shown above, with a backlink a couple of lines down. To apply the backlink, highlight your anchor text and hit the "URL" button. Follow the format shown in the screenshot above and click submit... Done! Do this with two different forum threads.

## Do-Follow Backlinks

### 4. Scratch (PR7 EDU!)

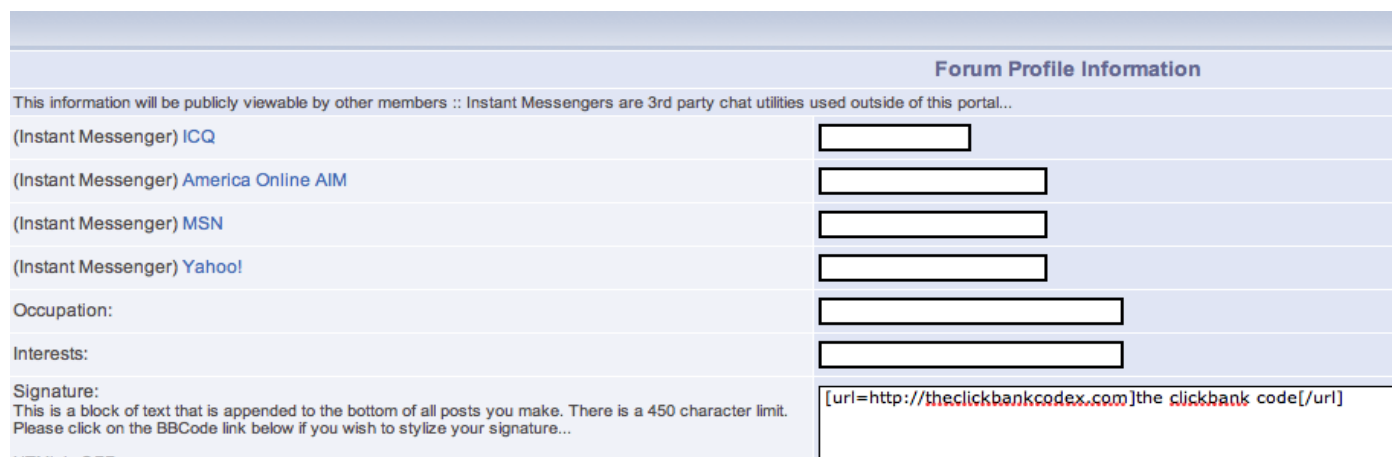

<http://scratch.mit.edu/forums>

Here is a real high quality one for you guys; not only is this a .EDU site (believed to be perceived as higher quality by the search engines), the site is a massive PageRank 7, which passes on a PageRank of 4 to the forum pages. This is some VERY good juice! Make sure you \*do not\* spam this site. To apply a backlink, register and go to make a post. After you write a short message as shown above, put some dashes and then below enter a hyperlink with your anchor text as shown in the screenshot above. Easy stuff!

### 5. MBDA (PR5 GOV!)

<http://www.mbda.gov/apps/forum>

Here's another authority do-follow backlink, this time in the form of a .GOV - also known to be seen as superior by the search engines. Register for the forums and head over to your profile section; scroll down to signature as shown above, and create a signature link with your desired anchor text using the format shown above - you should be used to this by now! Once done, hit save and head over to the forums... Find a thread to post in, and well, make a post! Ensure you tick the 'include my signature' box so your link gets posted too. Make a couple of posts, and you're done! Do not overdo this one either, as you may get your account banned.

I highly recommend you implement these if you are struggling with your rankings or need that extra boost. More to come!
